Myint & Associates
Telecommunications Ltd.

Build through **Excellence**

Lead with **Integrity**

About Us

Myint & Associates Telecommunications Ltd. (M&A Telecoms) is the information technology arm of the MPRL E&P Group of Companies. M&A Telecoms owns and operates Myint & Associates Data Center (M&A Data Center), the first high-end data center in Myanmar which has achieved Tier III design certification from the Uptime Institute, the global data center authority based in the United States.

Now in operators for over seven years, M&A Data Center maintains the highest reliability standards and continues to boast zero operational downtime performance to date since commencement of operations. In the coming years, as trends in information technology continue to evolve, M&A Data Center plans to advance its services through further advancing its shared hardware virtualization and cloud computing capabilities to benefit customers by delivering efficient automate on-demand IT services that are even more reliable, responsive, and suitable towards future business needs.

Our Vision

To be a leader in creating value by providing information technology solutions in a rapidly developing and globalizing environment.

Our Mission

M&A Telecoms will create value by:

- Being a regional market leader in providing reliable, secure, and sustainable data center facilities and the highest level of quality and services to best address the needs of government and customers.

- Developing and offering innovative solutions that deliver measurable improvements towards the information technology needs of our clients.

- Maintaining the highest levels of professionalism, integrity, and ethics in all our dealings with our stakeholders, partners, and clients.

Accreditation and Certification

Uptime Institute

In 2015, M&A Data Center received Tier III Design Certification from the Uptime Institute, the global data center authority based in the United States. Uptime Institute is the information technology industry's most trusted independent organization that establishes world-wide industry standards for the design, development and operations of data centers. Being a Tier III Design certified data center, M&A Data Center guarantees Tier III's performance which is clearly reflected in our service level agreements (SLA) that are executed with all our clients and customers. This independent third-party certification from the global data center authority reinforces our intent and capabilities to offer a high-end data center that meets world class standards of reliability, safety, and security.

PCI DSS – Payment Card Industry Data Security Standard

M&A Data Center has also achieved independent third-party compliance certification making the facility compliant with the Payment Card Industry Data Security Standard (PCI DSS). Administered and managed by a consortium of major card brands including Visa, MasterCard, Discover, American Express and JCB, PCI DSS is a stringent set of security requirements and protocols established to protect cardholder information from credit card fraud. Qualified Security Assessors (QSA) have audited and assessed M&A Data Center according to the PCI DSS's established standards and guidelines. The assessment by QSA also includes a review and audit of company policies and procedures, data center facility physical access controls, closed circuit security monitoring, as well as employee/visitor access procedures. M&A Data Center have received proven and verifiable PCI compliance in the form of assessment results indicated in the Attestation of Compliance (AOC) and Report on Compliance (ROC). By being compliant with the world-class standards set forth by PCI DSS, financial institutions and enterprises that involve the use of payment cards are assured that their IT infrastructure hosted within M&A Data Center is physically secure.
